

Information on Ordering PET Scans for Urology and Genitourinary Surgery in Ontario

Ontario continues to approve new indications for PET scan use including recent approval of PSMA-PET that makes this vital test easier to order. Below is a brief overview of the streamlined ordering process, to help urologists and genitourinary surgeons put PET scans to work for their patients.

How do I order a PET scan?

1. [Register](#) via CCO's online referral tool
2. Once registered, [login](#) to download the appropriate requisition form and submit your request. Some indications will require supporting documentation.
3. Send your request to the [location](#) of your choice.

Which cases can I order a PET scan for?

Visit www.morepets.ca for links to CCO information on eligibility, supporting documents, and available locations for each indication.

PET scans are **pre-approved for OHIP funding** for the following Genitourinary Cancers:

Indication

Prostate Cancer

Requisition Form

[PSMA-PET Request Form & Eligibility Checklist](#)

Bladder (muscle invasive) -
TNM stage T2a-T4a, N0-3, M0
Germ cell tumours

[Genitourinary PET Requisition Form](#)

PET Scans are **available for the following use cases via the Ontario PET Registry or PET Access Program**. Requests can be made via a simplified form with supporting documentation:

Indication

Bladder Cancer (muscle invasive) -
M1a or M1b disease

About the More PETs Coalition

The More PETs Coalition is a group of engaged organizations and individuals, including doctors, patients, health charities, and radiopharmaceutical providers. We want to make sure that doctors and patients are aware that PET scans are available and simple to order in Ontario – and that receiving one can help save or extend a patient's life.
